## Introduction

Over the past number of years, we have heard repeated claims that we need to “Ascend” to a 5<sup>th</sup> Dimension”. These claims coming to us from a number of channeled sources such as Ashtar Command, Sananda, St Germaine, The Agarthans, The Galactic Federation of Light, etc. etc.

We have all read these messages from our inter-galactic “friends” and, for the most part, many people have accepted these claims and offers of help at face value in the hope that the actions of these alien beings will resolve all of the desperate problems we have here on Earth.

In fact, so desperate are we to remove ourselves from the current conditions on Earth that we are prepared to accept these promises of help without question.

Rarely, if ever, have people asked themselves what “Ascending to the 5<sup>th</sup> Dimension” would actually mean for us, humans, or to the planet we live on.

Currently, scientists describe us as living in a three dimensional world.

There is nothing special about this description as all it describes is the fact that we are physical – each of us, and the objects we encounter in life, have a physical form that is described as being three-dimensional.

We can measure these three physical dimensions in a physical way (see illustration) – the length, width and height of our physical world define who we are in terms of physical bulk and also our physical location in relation to other objects or to other people.

That is what is meant by we live in a three-dimensional world – we have a physical presence and a physical existence.

Some scientists argue that time can be considered to be a 4<sup>th</sup> dimension but that is difficult to comprehend in any practical way, as time is also relative.

Illustration of Three Dimensions

Whilst time can be measured in a linear fashion – one second following another; one minute following another; one hour following another etc. it is not the way in which we perceive time.

For example:

If we are having a busy day then one hour can feel as though it has passed in a minute. Whereas if we are having a very boring day then one minute can feel to have taken an hour.

So whilst time can be measured, we perceive it in different ways depending upon our circumstances.

Also, if you talk with quantum physicists, they will tell you their theories about multiple dimensions existing outside of our solar system.

But, these are just theories and are not “provable” in any way, as we cannot access anything that exists outside of our solar system.

To all intents and purposes, we are three-dimensional beings who live on a three-dimensional planet that exists within a three-dimensional solar system.

What occurs outside of our solar system and the dimensions in which other planets exist or the dimensions in which other forms of life exist, is totally unknown to science.

## Five Dimensions

So what can be meant by the “5<sup>th</sup> Dimension”?

The fundamental problem is that nobody knows.

Neither can we comprehend, from our three-dimensional world, what a fifth-dimensional world would look like or how it would function.

Those who have listened to, and believed in, these channeled messages assume that existing in a 5 dimensional world is superior to living in a 3 dimensional world – but how do we know?

We don't.

We assume, without any kind of knowledge or understanding that living in a 5 dimensional world is better than living in a 3 dimensional one.

Why would we assume this?

Those who have channeled these messages have never explained what the implications of changing our world from 3 to 5 dimensions actually means.

How will it change our lives? How will it change the planet? How will it change the solar system?

To these questions no answers have been provided.

However, the most important question of all is:

Can we, and the planet, survive in a 5 dimensional existence?

Answer:

No answer to that question has ever been provided by those who propose that we shift to a 5<sup>th</sup> dimension. We have just *assumed* that it is possible.

We will return to that question a little later.

## Dimensional Differences

Our solar system, and particularly the Earth, exists as a three dimensional, physical, reality.

Let us pose a question:

What if we, humans, decided to “Ascend to the 5<sup>th</sup> Dimension” whilst the Earth decides that She wants to stay in Her three-dimensional, physical existence, what would happen to us? What would happen to the Earth?

After all, we have been Created with the absolute freedom to choose our path in life. If we decide to move on and the Earth does not, what would happen?

That is a difficult question to answer as we do not have any awareness or experience of anything other than our three-dimensional physical world.

This question has been considered by many scientists over the centuries and explored in many books and movies.

So here is one example of what could happen.

The TV series “*Star Trek – The Next Generation*” had an episode that explored this question.

Captain Jon Luc-Picard and the crew of the *Star Ship Enterprise* were warping through the galaxy when the ship came to a sudden halt.

The engines and all of the ship's systems were working perfectly, they could detect nothing outside of the ship that could have stopped them and yet they were marooned in space.

They fired one of their “probes” out into space to look at the ship from the outside but could not see or detect anything.

They could not move forwards or backwards nor could they move up or down – just locked into position without anything apparently stopping them.

Eventually, they realised that the probe had filmed an extremely thin line, virtually undetectable, at the mid-line of the ship.

What the ship had hit was a colony of beings that existed only in two dimensions. In other words, they had width and depth (see illustration above) but no height.

The three-dimensional humans, and their three-dimensional technology, could not detect the existence of these beings and the two dimensional beings could not perceive the three-dimensional ship.

So if we decided to “Ascend to the 5<sup>th</sup> Dimension”, and the Earth chose to remain in three dimensions, would the Earth still be able to perceive us? Would we still be able to perceive the Earth? Or would we all end up as the equivalent to ghosts, doomed to wandering around a planet we could no longer interact with or even live on?

That cannot be answered until we actually “Ascended”.

If that scenario actually happened, we would be lost souls, wandering about without a home but still trapped within the solar system.

The other question is what would happen if we chose to “Ascend to the 5<sup>th</sup> Dimension” and the Earth chose to join us?

Nobody knows.

Neither do we know what would happen to all of the other forms of life that we currently share the Earth with.

Would our pets be able to “Ascend”? Nobody knows. Would trees be able to “Ascend”? Nobody knows.

But there are some things we can work out and what the implications of this “Ascension” would be.

**Illustration of Our Solar System and Its Enclosing Energy "Bubble"**

Illustration © Chris Thomas 2003-2013

### Our Solar System

Our solar system is contained within an energy "bubble". This is quite deliberate as the energy "bubble" contains all of the energy frequencies that make our solar system three-dimensional – makes our solar system "physical". So we inhabit an enclosed region of space that is specifically designed to generate physical life that exists in three dimensions.

Our location at the edge of a nondescript galaxy at the outer edges of our Universe is not accidental. "Physical" life does not exist anywhere else in the whole of Creation. No physical life exists either in our Universe or in any other universe anywhere or at any time. Physical life only exists on Earth. Physical life exists on Earth because the energy patterns that are contained within our energy bubble were specifically designed to Create "physical" matter in a three-dimensional form.

If we, and the Earth, chose to alter our fundamental make-up to a five-dimensional form, we would have to fundamentally change the energy patterns within our energy bubble.

But, if we raise the energy patterns within our energy bubble, we would no longer be physical. Raising the energies of the solar system from those that currently exist would alter not only our fundamental state of being but also the state of being of all of the life we share the Earth with but also the fundamental state of being of all of the other planets.

In other words, we would no longer be physical beings living on a physical planet sharing our solar system with other physical planets. We would be dead.

### Outside of Our Solar System

Science might not know for certain about what conditions exist outside of our solar system but the Akashic does.

Throughout the rest of the Universe, there are two fundamental states of being:

1. Non-physical.
2. Semi-physical.

#### 1. The Non-Physical Races

The non-physical races exist in realms of our Universe that are very far beyond our three-dimensional space.

These are souls that exist in a state of pure energy. In other words, they have no physical form or physical density, just pure soul energy.

Given their energetic form, and lack of density, they cannot be measured by our three dimensional methods – length, width and height are meaningless in a non-physical existence.

But, they can be measured in energy terms and in order to do this, we have to turn to the other meaning of the word “dimension”.

A dimension is also the measurement of energy patterns, of levels of energy at which something exists.

In this way, our solar system can be seen as being defined by three dimensions of physical measurement but also by three dimensions of energetic measurement.

In the realms of the non-physical races, their existence is defined by an energy range of between  $10^{13}$  and  $10^{15}$  dimensions (that is: a range between ten to the power of thirteen and ten to the power of fifteen dimensions).

In other words, so far out of our level of comprehension that we cannot begin to imagine life at that level of existence.

## 2. The Semi-Physical Races

The Semi-physical races do have a form and a density but are far outside of our three-dimensional range.

There are seven of these races and it is one of these races that is trying to tell us that we need to “Ascend to the 5<sup>th</sup> Dimension”.

As there are seven of these races, they are comprised of a large range of dimensional frequencies. These races vary between  $10^3$  to  $10^6$  dimensions (that is: a range between ten to the power of three and ten to the power of six).

The semi-physical races are also considerably beyond our three dimensions.

\* \* \*

As can be seen, no life within this Universe exists at levels of existence that are anywhere near our three-dimensional world and even if we did raise ourselves to the “5<sup>th</sup> Dimension” we would be nowhere near to their levels of existence.

Not only would we be no longer physical, we would not even be able to interact with any of the other forms of life that exist within our Universe. We would be totally lost souls.

## Energy

Then there is the final question: If we, and the Earth, were to “Ascend to the 5<sup>th</sup> Dimension”, where would the extra energy required to achieve this come from?

There is only one answer to that question and that is from outside of our solar system.

The 5<sup>th</sup> Dimension © Chris Thomas November 2013

As can be seen from the illustration of our solar system, the solar system is enclosed by an energy bubble that contains the correct blend of energy frequencies that make us physical.

These “physical” energies are finely balanced with little latitude for alteration.

There are two “gateways” in and out of our solar system – one that corresponds with the constellation of Orion that connects into the rest of the Universe and one that corresponds to the constellation of Draco that connects to the realms of the semi-physical races.

Both of these gateways act like “air-locks” in that they prevent the contamination of our solar system with any of the energy patterns that exist outside of the solar system bubble.

Both of these gateways have been in existence since our solar system began to form millions of years ago.

The only way to bring in enough energy into our solar system to raise our frequencies to the “5<sup>th</sup> Dimension” would be to form a new entrance through the solar system bubble. Or, to use the terms used by our “alien friends”, to form a new “portal”.

So what would happen if such a portal was opened?

Answer: it would allow in energy frequencies that destroyed the balance of energies that already exist in our solar system.

What would result from this new imbalance?

Answer: the total destruction of every physical thing within this solar system.

## Conclusion

The race that is behind all of these channeled messages that are trying to make us believe that raising ourselves and the Earth to a “5<sup>th</sup> Dimension”, is a good thing, have their own agenda.

That agenda is not beneficial to us, to the Earth or to the solar system as a whole.

The Earth has made it very clear that She wants nothing to do with this race and has denied them access to our solar system.

The only reason why this race wants to be here is to take over the Earth and remove humans and all other life.

This race sees themselves as “God’s Chosen People” and that they should be living on “God’s Chosen Planet”. In other words, they believe that they should be living on Earth and not humans.

This is the reason for all of the channeled messages: they are determined to make the Earth their own and so have tried to make us believe that they are helping us.

But

The Earth has rejected them, as have the vast majority of people and this rejection does not sit well with this race. After all, they see themselves as “God’s Chosen People” and so

should be allowed to live wherever they choose and act in any way in which they choose.

To be rejected is not something that their egos can permit.

If we look further afield, we find that not only have the majority of humans rejected this race, the Earth has rejected this race but the other semi-physical races have also rejected this race.

In other words: Nobody with this Universe wants this race to exist as their actions have shown that they have no respect or interest in any other form of life. They destroyed all life on their original home planet and their intention in coming to Earth was to remove all of the life on the planet and take it for their own.

Within the philosophy of this race is the belief that if they cannot have something then nobody else can. They will destroy rather than see some other form of life living where they think they should be living.

This is why there are all of these channeled messages telling us that we must open “portals” through our solar system.

This is why they keep telling us that we need to “Ascend to the 5<sup>th</sup> Dimension”.

It is in order to destroy us.

It is in order to destroy the Earth.

It is in order to destroy the solar system.

In their channeled messages, this race has adopted a huge variety of names as well as a huge variety of origins but as far as the Akashic is concerned, they only have one name and that name is Velon.

If you see or hear a channeled message, it will be of Velon origin no matter what names they claim for themselves.

If you see or hear a channeled message, no matter what religious character they claim to be, it will be the Velon.

If you see or hear a channeled message that claims to be from some form of inter-galactic organisation, it will from the Velon.

If you see or hear any channeled message that claims to be from some kind of inter-galactic council, it will be from the Velon.

(For a full description of how the Velon operate to fool us, see my previous essay entitled “Inter-Galactic War”)

\* \* \*

We live in a solar system that has perfectly balanced energies. It is this balance of energies that makes us physical and allows us to live on this truly amazing planet Earth.

We live in a solar system that is perfectly balanced to nurture physical, three-dimensional life.

Why would **we** want to change that?

The answer is that **we** don't.

It is the Velon that want us to change, nobody else does and the only reason **they** want us to change is because they want to destroy the solar system to prevent anyone else from living here.

But, **we** do need to change, we have allowed the world to degenerate into a place where the Velon controlled elite have everything whilst the rest of us barely have enough to survive.

Change does need to happen.

Change is already happening.

The elite are losing their power – the signs are all around us.

Everybody that is alive on Earth is aware that it is time that we changed. Everybody that is alive on Earth is aware that the time for change is now.

The problem is that there is confusion about how we undergo change for ourselves.

Into this state of confusion has stepped the Velon making all kinds of broken promises about how they will do all of the work for us.

Instead of looking to someone to lead us to the “5<sup>th</sup> Dimension”, we need to look to ourselves.

What we should be doing is re-integrating the whole of the soul back into the physical body.

Once we have achieved soul re-integration, we will be able to communicate with all living things by psychic means. We will be able to think ourselves to a new location and then carry our physical body along the thought. We will be able to heal our bodies of all illnesses. We will be able to remove the Velon and the elite.

In other words, we will live at a level of existence that is so far beyond anything we can imagine a “5<sup>th</sup> Dimensional” existence as being that the term “5<sup>th</sup> Dimension” is totally meaningless.

But we would still be living in our three-dimensional physical bodies, living on our three-dimensional Earth within our three-dimensional solar system.

We have all of the tools necessary to change ourselves, and the world in which we live, already built into our bodies.

What we need to do is to activate these “built-in” tools and bring the rest of the soul, the higher self, into the physical body.

**This is the real meaning of what we understand as “change” – to be a complete soul within a physical body. We cannot “Ascend” anywhere, as that would destroy us and the Earth, we just need to re-integrate and remain physical.**

## Books About Earth History by Chris Thomas

### The Journey Home

ISBN 186163041-7  
Price: £ 7.95

### The Fool's First Steps

ISBN 186163072-7  
Price: £ 9.95

### Planet Earth - The Universe's Experiment

ISBN 186163224-X  
Price: £ 11.95

### The Universal Soul

ISBN 186163273-8  
Price: £ 12.95

### The Human Soul

ISBN 186163273-8  
Price: £ 13.95

### Project Human Extinction written with Dave Morgan

ISBN 1-86163-312-2  
Price: £ 16.95

### The Annunaki Plan? or The Human Plan?

ISBN 978-0-9566696-0-5  
Price: £ 6.50

### Synthesis

ISBN 978-0-9566696-1-2  
Price: £ 9.50

## Books About Healing by Chris Thomas & Diane Baker

### The Healing Book

ISBN 186163053-0  
Price: £ 8.95

### Everything You Always Wanted to Know About Your Body.....

ISBN 186163098-0  
Price: £ 17.95

### The Sequel to Everything

ISBN 18616337-5  
Price: £ 11.95
